On The Stock Market Front

During the month, the stock market witnessed lackluster activity with thin volumes. The KSE - 100 index increased by 0.45% to close at 9,657.79 points. Average daily trading volumes stood at 169 mn shares as compared to 187 mn shares traded during January 2010. The KSE-100 index successfully marched towards 10,000 levels on the back of better results and payouts, however, lost momentum due to news of resignation of Finance Minister and implementation of Capital Gain Tax.

Corporate results announced during the month were well inline with the market expectations. Fertilizer sector profitability registered sound earning growth of 21% for CY09 as compared to CY08 with FFC leading the way followed by FFBL. Power Sector posted massive earning growth of 29% for the 1HFY10 against the same period last year. HUBCO with 68% earning growth was the star performer. Cement sector's profitability plunged primarily on account of lower retention prices. Oil and banking sectors posted mix results very much inline with the market expectations.

During the month foreigners remained net buyers with net inflow of US\$16.6 mn. Given the expected decent earning growth for next couple of years along with anticipated gradual decline in discount rate the equities are expected to yield attractive returns to long term investors.

On the Money Market Front

The SBP conducted its latest T-Bill auction on February 24, 2010 and managed to raise PKR 113.37 bn. The t-bill yields for all tenors were raised between the range of 22-28 bps in view of the rising inflation, resulting in cut off yield of 12.195%, 12.280% and 12.343% on t-bills of 3 month, 6 month and 12 month tenor respectively. In line with the trend, the six month KIBOR rate also increased by 20 bps from 12.23% as at the end of Jan '10, to 12.43% as on Feb 26, 2010, whereas one month KIBOR rate depicted only a slight increase from 12.39% as at previous month end to stand at 12.41% as at the end of Feb '10.

Although the economy is showing signs of recovery, the challenges in terms of inflation, international commodity prices and fiscal management continue to affect the pace of growth. Going forward, the inflationary trend is expected to continue to have its influence on the upcoming monetary policy direction.
