5. Risk Disclosure

- 5.1 In addition to the risks disclosed in the Offering Documents of ASMF and AIF, the investment in the Atlas Bachat Balanced Plan (*Formerly Balanced Plan*) is exposed to the following risks:
 - 5.1.1 Owing to the volatile nature of the stock market, the Atlas Bachat Balanced Plan (*Formerly Balanced Plan*) may suffer losses in the short term. Thus an investment in

the Atlas Bachat Balanced Plan (*Formerly Balanced Plan*), to the extent of it being in the ASMF, would be exposed to higher risk and possible loss of capital, which may be recovered if the investment is retained for the long term.

- 5.1.2 The NAVs of the Funds may be affected by changes in the general market conditions, factors and forces affecting capital market, in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures.
- 5.1.3 The liquidity of the Plan's investments is inherently restricted by the trading volumes in the securities in which the respective Funds invest.
- 5.1.4 Whereas it is expected that a long-term investment in the stock market related to the ASMF is likely to outperform the AIF, a prolonged downturn in the stock market may not allow the recovery within a targeted investment period.
- 5.1.5 Over a time period, as a result of the different levels of performance of the ASMF and AIF, the overall portfolio is likely to have a higher weightage of one of the Funds. To this extent the exposure would be higher to such Fund at that point in time.
- 5.1.6 The process of continuous reallocations of Account balance between the ASMF and AIF can, under extreme circumstances, result in a higher exposure of the overall investment to the ASMF, thereby increasing the risk level of exposure and the possibility of loss of capital.
- 5.1.7 Investors in the Plan are not offered any guaranteed returns.
- 5.1.8 The target amount of saving and accumulation of the returns thereon in the AIF are based on best estimates of the performance of the Income Fund and is dependent on the ability to continue investing in similar investments on maturity of the investments in the portfolio. There is no guarantee as to the actual performance of the AIF. Similarly, the target amount of saving and accumulation of the returns thereon in the ASMF are based on best estimates of the performance of the stock market and the Management Company's actions based on the expected performance. There is no guarantee as to the actual performance of the ASMF.
- 5.1.9 The ASMF and the AIF are subject to being wound up under certain circumstances as explained in the respective Offering Documents. In the event of either of the Funds being wound up, the Atlas Bachat Balanced Plan (*Formerly Balanced Plan*) shall be discontinued and the Units standing to the credit of the Subscriber shall be dealt with the same manner the rest of the Units in the ASMF and/or the AIF.
