5. Risk Disclosure

- 5.1 In addition to the risks disclosed in the Offering Documents of AISF and AIIF, the investment in the Atlas Bachat Islamic Plan (*Formerly Islamic Income Multiplier Plan*) is exposed to the following risks:
 - 5.1.1 The NAVs of the Funds may be affected by changes in the general market conditions, factors and forces affecting capital market, in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures.

- 5.1.2 The liquidity of the Plan's investments is inherently restricted by the trading volumes in the securities in which the respective Funds invest.
- 5.1.3 Owing to the volatile nature of the stock market, the Atlas Bachat Islamic Plan (*Formerly Islamic Income Multiplier Plan*) may suffer losses in the short term. Thus an investment in the Atlas Bachat Islamic Plan (*Formerly Islamic Income Multiplier Plan*), to the extent of it being in the AISF, would be exposed to higher risk and possible loss of capital which may be recovered if the investment is retained for the long term.
- 5.1.4 Subscribers in the Plan are not offered any guaranteed returns.
- 5.1.5 The target amount of saving and accumulation of the returns thereon in the AIIF are based on best estimates of the performance of the Income Fund and is dependent on the ability to continue investing in similar investments on maturity of the investments in the portfolio. There is no guarantee as to the actual performance of the AIIF. Similarly, the target amount of saving and accumulation of the returns thereon in the AISF are based on best estimates of the performance of the stock market and the Management Company's actions based on the expected performance. There is no guarantee as to the actual performance of the AISF.
- 5.1.6 Subscribers may note that the Fund Manager's investment/ asset allocation decisions for the Funds may not be always profitable.
- 5.1.7 Whereas it is expected that a long-term investment in the stock market related to the AISF is likely to outperform the AIIF, a prolonged downturn in the stock market may not allow the recovery within a targeted investment period.
- 5.1.8 The process of continuous reallocations of account balance between the AISF and AIIF can, under extreme circumstances, result in a higher exposure(not more than 10% variation from required asset allocation) of the overall investment to the AISF, thereby increasing the risk level of exposure and the possibility of loss of capital.
- 5.1.9 The AISF and the AIIF are subject to being wound up under certain circumstances as explained in their respective Offering Documents. In the event of either of the Funds being wound up, the Atlas Bachat Islamic Plan (*Formerly Islamic Income Multiplier Plan*) shall be discontinued and the Units standing to the credit of the Subscriber shall be dealt with the same manner the rest of the Units in the AISF and/or the AIIF.
